Professore di Logica nell Università di Napoli
Indirizzo Via S. Saba, 6 00153 - Roma.

Dear Sir,

- Thank you very much for your letter from 27-th 9.1976.
I am enclosing the premissed copies of my letters which were to be sent. 1 Copy of Curriculum vitae of my husband written personally during the life of my husband which I copied myself.
2. Bibliographical nets with a partial list of published works of my husband.
3. The description of my husbands life.
4. The copy of my letter to Holy Father late Pope John XXIII from the 26-th of May 1962.
5. The letter to late president John Kennedy from May 1962.

These letters will tell you a lot about our experiences during the life of my husband and my experiences after the death of my husband.

I would like to mention here dr. Alfred Teitelbaum-Tarski was my husband's assistant. Prof. Oscar Halecki wrote to my husband in a confidential letter that Tarski refused any help to my husband on political reasons. My husband was not a politician but a great scientist. He always had a lot of problems to solve and no time for politics.

It is a scandal in the history of science that the professors of the University like Lewis of Harvard University and J. Woodger and Witkenstein falsified and ascribed the multi-valent logic to Tarski from the work of Jan Lukasiowicz Untersuchungen über den Aussagenkalkül. 1954.

After the death of my husband when I returned from Oxford 22 of March 1956 and found that the manuscripts are stolen I notified the authorities and the police. After I returned from the convent on the 4-th of June 1956 which I was taken by force from my flat the 8-th of May 1956 I found a great part of selected manuscripts returned to me which were stolen between 21 of February and 22 of March 1956 when I was in Oxford with the correction of my husband work but the other part of manuscripts was unneticed in the other room covered by the linen which awaited the taking to the laundry. It disappeared between May and June 1956 when I was taken and imprisoned in the convent.

When I decided to return to Poland I took a great part of the returned and selected manuscripts and letters with me. I arrived to Poland on 19-th of August 1957 to Gdańsk-Wrszeszcz where all the manuscripts and letters were stolen from me in Gdańsk and my flat in Gdańsk-Wrszeszcz.

Dr. Alfred Tarski spread the untrue political gossips about my husband prof. dr. Jan Lukasiowicz among the scientists, professors and his sympathisers of various countries.

Prof. C.J. Lewis of Harvard University of USA made a mistake in his textbook and attributed unjustedly to Teitelbaum-Tarski my husband's discoveries of a system of three and multivalent logic. Lewis corrected it in a Reprint from the Journal of Philosophy Vol. XXX. No 13 June 22, 1933 but nobody knows that such a note exists. He did not correct it in his textbook and that mistake circulates among the young and old scientists in the whole world.

Metalogicon (1990) III, 1

The book of Taraki appeared in 1956 after the death of my husband and there was a footnote of my husband explaining that Jan Lukasiwicz is a sole creator.

My husband strongly protested in Oxford against the falsification of. prof.J.Wedger from London, prof.Lewis from USA and Wittgenstein from Cambridge and demanded that it is corrected and returned according to the text of the original of German work. A note was inserted and it was corrected.

I'm sorry that I don't know Italian language and I cannot read this book which you have sent. I remember that my husband had two books written in manuscripts about the introduction textbook in English and in Polish ready for printing. The English version was bigger. They were both stolen in manuscripts.

He wrote also Essays of philosophy based on mathematics and modal logic 1800 pages in manuscripts and 200 in rough notes.

My husband worked on the infinity number. Once he used a modal system and the other time he used the other system. Once resulted the infinite number and once the finite number. It needed only verification. It was written in nuclear age, but he was ill in hospital and he couldn't finish his work about infinite number.

After reading the footnote of Wedger and Taraki it makes an impression that it is a dirty trick. They waited on the death of my husband for 5 years until the book of Taraki appeared. As a successor which was very interested in this note, I did not get the Taraki's book. I would like to ask you to confirm that you have obtained in the letter from me the promised letters which I have sent.

In future will you please write to me in Polish or English because I do not know the Italian language.

Yours sincerely

Regina Lukasiwicz
